

THANGAMANI RAJU

CYBERSECURITY ANALYST

thangamanir0605@gmail.com • +91-8072663268 • linkedin.com/in/thangamani-raju • Chennai, India

Immediate Joiner | Open to Relocation – Dubai, UAE

PROFESSIONAL SUMMARY

Cybersecurity Analyst with 4 years of 24x7 SOC experience monitoring security alerts across SIEM, EDR, IDS/IPS, and firewall platforms. Skilled in alert triage, log and IOC analysis, phishing and malware investigation, vulnerability management, and full incident lifecycle management with 100% SLA adherence. Hands-on with QRadar, Splunk, Google SecOps, and CrowdStrike EDR, with working knowledge of Windows/Linux OS fundamentals, TCP/IP, DNS, and HTTP/S. Proven record of reducing false-positive alerts by 25% and phishing incidents by 30% through tuned SIEM correlation rules and structured runbooks. SOC Tier 1 & Tier 2 experience with strong grounding in MITRE ATT&CK, threat intelligence, and CVE/vulnerability tracking. Immediate Joiner, ready to relocate to Dubai, UAE.

TECHNICAL SKILLS

- SIEM Platforms: Splunk, IBM QRadar, Google SecOps — real-time alert monitoring & correlation rule tuning
- EDR/AV & Endpoint Security: CrowdStrike EDR, Proofpoint, Antivirus tools; working familiarity with Microsoft Defender, SentinelOne, Trend Micro
- OS & Networking Fundamentals: Windows & Linux OS fundamentals, TCP/IP, DNS, HTTP/S, Firewall Analysis, Network Traffic Analysis, network troubleshooting
- Cybersecurity Concepts: Malware analysis, phishing investigation, DDoS awareness, brute-force detection, insider threat
- Incident Response: Alert triage (false positive vs. actionable), containment, eradication, recovery, root cause analysis, incident playbooks
- Threat Intelligence: IP/URL/hash reputation lookups, VirusTotal, OSINT, CVE tracking, MITRE ATT&CK mapping
- Vulnerability Management: CVE Tracking, OSINT Research, Threat Prioritization
- SOC Operations: SOC Tier 1 & Tier 2, 24x7 shift coverage, SOC runbooks/SOPs, incident ticketing & escalation, SLA/KPI adherence (TTT, TTQ)
- Security Frameworks: OWASP Top 10, MITRE ATT&CK, Cyber Kill Chain, Zero Trust
- Penetration Testing Tools: Nmap, Metasploit, Burp Suite, Kali Linux

PROFESSIONAL EXPERIENCE

Security Analyst — Verizon India Pvt. Ltd., Chennai

May 2023 – Present

- Monitored and triaged 1,000+ security alerts daily across SIEM, EDR, and network platforms (Splunk, IBM QRadar, Google SecOps), distinguishing false positives from actionable incidents per SOC SOPs.
- Investigated phishing, malware, and suspicious user behavior end-to-end — detection, triage, containment, eradication, and recovery — achieving 100% SLA compliance.
- Performed EDR-based threat hunting with CrowdStrike, analyzing process execution, file behavior, and lateral movement indicators; conducted IP/URL/hash reputation lookups for IOC validation.
- Created and maintained incident tickets with accurate timelines and root cause analysis, and escalated confirmed incidents to L2 analysts.
- Collaborated with global threat intel teams to tune SIEM correlation rules, cutting false-positive alerts by 25%; contributed to a 30% reduction in successful phishing incidents.
- Supported shift handovers in a 24x7 rotating SOC environment, ensuring smooth operational continuity.

Security Analyst — WATI – West Advanced Technologies Inc.

Nov 2022 – Mar 2023

- Conducted phishing analysis including email header inspection, URL reputation checks, and sandbox detonation using Proofpoint and VirusTotal.
- Assisted senior SOC analysts with alert triage, case enrichment, severity classification, and escalation via ticketing systems.
- Designed phishing simulation campaigns to evaluate employee awareness and SOC detection readiness.

EDUCATION

B.Sc. Information Science and Cyber Forensics — Dr. M.G.R. Educational and Research Institute, Chennai (2022, CGPA 7.31/10)

KEY PROJECTS

Phishing Simulation and Incident Analysis

- Built a phishing simulation lab using Kali Linux and ZPhisher to capture phishing artifacts and IOCs.
- Produced structured incident investigation reports analyzing attacker techniques and TTPs.

SIEM Detection Engineering

- Developed and tuned custom correlation rules in Splunk and IBM QRadar for brute-force, privilege escalation, and malware execution.
- Mapped detection logic to MITRE ATT&CK techniques for improved threat coverage.

Incident Response Playbook Development

- Designed standardized playbooks for phishing, malware outbreaks, and insider threat scenarios.
- Reduced investigation response time through predefined structured workflows.

Kali Linux Penetration Testing Toolkit

- Configured and automated Nmap, Metasploit, and Burp Suite in controlled lab environments.
- Conducted simulated adversary attacks to identify defensive gaps.

CERTIFICATIONS

- CompTIA Network+
- CrowdStrike Fundamentals
- Proofpoint Security Awareness Training
- CICSA – Certified Information and Cyber Security Analyst
- Red Team Hacker Academy | TCM Security Training
- TryHackMe and Hack The Box – Hands-on Labs
